

Complementary, Alternative, and Traditional Medicine

Prospects and Challenges for Women's Reproductive Health

A comprehensive overview of how complementary and alternative medicine (CAM) and traditional medicine (TM) affect women's reproductive health, this volume brings together a diverse collection of perspectives from the field to explore the role of CAM and TM across cultures. Providing a detailed analysis, authors address the cultural values and medicinal uses of CAM and TM for reproductive health among women in different sociocultural environments and geographic settings. Maria Costanza Torri and Jennie Hornosty's edited collection explores how traditional practices can improve the well-being of women and highlights the differences and complementarities between traditional medicine and biomedicine. Accessible and pedagogically rich, this is a crucial contribution to medical anthropology, sociology of health and medicine, women's health, public health, and health policy.

Author Information

Jennie M. Hornosty
Dr. Jennie M. Hornosty is a retired Adjunct Professor of Sociology at the University of New Brunswick.

Maria Costanza Torri
Dr. Maria Costanza Torri is an Associate Professor of Sociology at the University of New Brunswick.

Reviews

"This collection strongly supports the need for midwifery and complementary medicine, and it demonstrates through the research how valuable and important this health service is for women.... The cases studied were ideal for showing how midwifery promotes women's health and gives them a strong nurturing element during the miraculous but painful time of delivering a child."— Dr. Nancy-Angel Doetzel, Department of Sociology and Anthropology, Mount Royal University_

"_Complementary, Alternative, and Traditional Medicine_ is a must-read for those looking for a global perspective on the current use of complementary and traditional therapies in the treatment of infertility and other prominent women's health issues. Using an assortment of case studies from around the world, it provides a comprehensive perspective on a patient's choice and decision-making process when selecting a particular CAM therapy.... Moreover, its pedagogical value to any practitioner or teacher attempting to help others make a critical and informed decision about their health-care choices cannot be overlooked."
— Dr. Alistair Dias, Associate Professor, Teaching Stream, Human Biology Program, University of Toronto_

Introduction

PART I: KEY ISSUES AND HISTORICAL PERSPECTIVE

Chapter 1. Introducing Complementary and Alternative Medicine, Traditional Medicine, and Gender, _Daniel Hollenberg and Maria Costanza Torri_

Chapter 2. Women as Healers in the Global Community: An Overview from Antiquity to the Present, _Daniel Hollenberg_

Chapter 3. Herbal Fertility Treatments in Colonial North America and Prospects for Modern Medicine, _Cheryl Lans and Rachel Westfall_

Chapter 4. Being "There" for Pregnant Women: Canadian Midwives in Indigenous and Settler Communities, _Cecilia Benoit, Dena Carroll, and Rachel Westfall_

PART II: GLOBAL SOUTH

Chapter 5. Childbirth in Brazil: Voices of Brazilian Women, _Natália Rejane Salim and Julie Laplante_

Chapter 6. Intercultural Birth Practices and Reproductive Health in Ecuador, _Maria Costanza Torri_

Chapter 7. Giving Birth in the City of Cochabamba, Bolivia: Traditional Birth Attendants' Practices Versus Biomedical Maternal Health Care, _Maria Costanza Torri and Julie Laplante_

Edirne_

Chapter 10. Birth from the Peripheries: Local Realities in Dzodze, Ghana, _John Paul Nyongator_

PART III: GLOBAL NORTH

Chapter 11. A Post-colonial Feminist Analysis of Two Popular Complementary Medicine Hot Flash Remedies, _Nadine E. Ijaz_

Chapter 12. The Use of Complementary and Alternative Medicine by Australian Women for Infertility, _Jo-Anne Rayner and Karen Willis_

Chapter 13. Traditional Chinese Medicine Practitioners' Constructions of "Hard" and "Soft" Evidence in the Treatment of Fertility Issues: Opportunities and Challenges, _Ana M. Ning_

Chapter 14. The Value of Complementary and Alternative Medicine for Breast Cancer Survivorship, _Ausanee Wanchai, Jane M. Armer, and Bob R. Stewart_
